

# MEET THE CRABS

MEET THE CRABS

## About

Hermit Crabs can live 40-50 years with proper care! We need 80 degrees & 80% humidity for warmth and ability to breathe. Tank size should be 10 gallons per crab in order for them to thrive. We also need 3-5 appropriately sized extra shells each in the tank. Substrate 6 inches deep. 5:1 ratio of eco earth to playsand.

## Their Favorites

- Love lots of enrichment to climb on.
- Enjoys snacking on safe leaves, wood, and flowers.
- Very Social. Loves having hermit crab friends!
- Walking a hamster wheel.
- Nocturnal
- A saltwater & fresh water pool.
